EMPLOYMENT

- 2018 –** **Freelance Research Consultant and scientific-software developer** in Computational Optometry. Currently collaborating in the NIH R01 project entitled Early detection of glaucoma progression using a novel individualized approach and the VA Merit review project entitled Testing of the far peripheral visual field—Obtaining the Full View.
- 2017 – 2018** **Scientist I** in the Department of Ophthalmology, UAB Medicine, working with Dr Lyne Racette on the NIH R01 project entitled Early detection of glaucoma progression using a novel individualized approach (70% effort). I am also working with Dr Michael Wall from the University of Iowa on the VA Merit review funded project entitled Testing of the far peripheral visual field—Obtaining the Full View (30% effort).
- 2017** **Assistant Research Professor** in the Department of Ophthalmology, Indiana University School of Medicine working with Dr Lyne Racette on the NIH R01 funded project entitled Early detection of glaucoma progression using a novel individualized approach.
- 2013 – 2016** **Research Fellow** in the Departamento de Óptica at Universitat de València; working with Profs Robert Montés-Micó, Norberto López-Gil from the Universidad de Murcia, and Philip Kruger from SUNY College of Optometry, on a project entitled Signals For Accommodative Responses In Humans. The overarching aim of the project is to identify the optical signals that control accommodation and emmetropization of the eye and can lead to detection of individuals at risk of developing myopia. My main duty is the development of software to drive the experiments performed with adaptive optics technology and the extraction, processing, and analysis of results.
- 2013** **Research Fellow** in the Indiana University School of Optometry; working with Prof Larry N Thibos on a project entitled Measuring aberrations of accommodated myopic eyes over a wide field of view and developing peripheral image quality metrics. My main duty was the development of MatLab software for the automation of routine statistical analysis and exploratory data analysis of image quality metrics of the accommodating eye for emmetropes and myopes.
- 2010 – 2012** **Research Fellow** in the Indiana University School of Optometry and the Department of Optometry and Visual Science at City University London; working with Profs William H Swanson and David P Crabb on a project entitled Application of Psychophysical Models to Visual Disorders (<http://newsinfo.iu.edu/news/page/normal/13053.html>). My main duty was the development of statistical methods suitable to address specific questions of the grant and, more generally, for clinical research in glaucoma. The specific

questions of the grant include analyses of agreement (or association) between different structural and functional measures for diagnosis and assessment of progression in glaucoma, methods for combining structural and functional information, and to determine whether such methods do improve diagnosis. In addition, I have developed the R statistical package visualFields for the analysis and visualization of visual fields (<http://cran.r-project.org/web/packages/visualFields/index.html>), which is part of the OPI (<http://people.eng.unimelb.edu.au/aturpin/opi.html>).

- 2009 – 2010 Research Associate** in the Department of Biomedical Sciences and Human Oncology at the Università di Torino; working with Prof Franco Merletti on statistical analysis and data management of large studies in cancer epidemiology. Studies include SYNERGY, carried out by the International Agency for Research on Cancer (<http://www.iarc.fr/index.php>), and NINFEA (https://www.progettoninfea.it/index_en).
- 2008 – 2009 Research Assistant** in the School of Electrical and Electronic Engineering at the University of Manchester; working with Prof David H Foster in further development of the software modelfree (www.modelfree.manchester.ac.uk) within a project entitled Non-Parametric Stimulus-Response Functions for Psychophysics sponsored by EPSRC.
- 2006 Demonstrator in Geometrical Optics Laboratory** (first-year undergraduate module for Optometry degree) in the Faculty of Life Sciences, University of Manchester.
- 2003 – 2004 Analyst Programmer and Technology Consultant** at Coritel, group Accenture Spain (Barcelona and Malaga). My main duties were to create functional and technical designs for new developments in SAP (System, Applications, and Products) according to client requirements and specifications, as well as give advice to programmers, supervise their work, and ensure the final products reached the high quality standards determined by Accenture (maximum level, 5, of Capability Maturity Model, CMM). My particular responsibility was for the deliverables to clients, including Sara Lee, Gas Natural, and Infineon.
- 2002 – 2003 Analyst Programmer** at Coritel (Barcelona). Clients included Roche-diagnostics, Merck, and Ebro-Puleva
- 2001 – 2002 Programmer** at Coritel (Barcelona). Clients included Sanofi-Synthélabo

GRANTS

NIH R01 EY025756

\$1,950,000

Role: Co-investigator (70% effort)

Principal investigator: Lyne Racette

Title: Early detection of glaucoma progression using a novel individualized approach.

Glaucoma Research Foundation Shaffer grant

\$40,000

02/15 – 02/16

Role: Collaborator

Principal investigator: Lyne Racette

Title: Early detection of glaucoma progression using functional and structural data jointly.

BrightFocus Foundation

\$100,000

07/14 – 06/16

Role: Collaborator

Principal investigator: Lyne Racette

Title: An individualized model to monitor glaucoma progression.

IUPUI DRIVE

\$15,000 07/14 – 06/15

Role: Collaborator

Principal investigator: Lyne Racette

Title: A novel individualized structure-function model to monitor glaucoma progression.

GRANT APPLICATIONS

European Research Council Starting Grant €1,941,244

Role: Principal Investigator

Title: Adaptive optics for improved diagnosis of retinal pathologies.

(Score B. Ranking range 30–39%.)

Marie Curie Intra-European Fellowship (IEF)

Role: Research fellow

Title: Computational simulations of signals for accommodative responses in humans

(Score of 86.90 / 100.)

MEMBERSHIPS

2012 – Member of **The Royal Statistical Society**

2010 – 2017 Member of **The Association for Research in Vision and Ophthalmology**

2008 – 2017 Member of **The Colour group of Great Britain**

AWARDS AND HONORS

2015 **IMC international travel grant awarded by the program meeting committee for the International Myopia Conference (IMC) hold in Wenzhou, China, 2015.**

2014 **Paper selected for review in the International Glaucoma Review (IGR), 15-2, 2014: "Choice of statistical method influences apparent association between structure and function in glaucoma". The IGR is the quarterly publication of the World Glaucoma Association.**

2013 **Press release at ARVO website featuring the R package visualFields (<https://www.arvo.org/About/press-room/new-software-provides-free-framework-for-collaborative-research-in-visual-field-analysis/>).**

2008 **Best Presentation given by The Colour Group of Great Britain in the meeting at Bradford: "WD Wright & MacDonald/Green Awards: An Educational Exercise".**

2008 **MacDonald-Green Award given by The Colour Group of Great Britain for attendance at the Fourth European Conference on Colour in Graphics, Imaging, and Vision, 2008.**

2008 **Postgraduate Research Student Conference Travel Funds (PGR) given by The University of Manchester for attendance at the Fourth European Conference on Colour in Graphics, Imaging, and Vision, 2008.**

TEACHING EXPERIENCE

2015 – 2017 **Lecturer of the course statistics applied to optometry for the *Master in Advanced Optometry and Vision (Máster en Optimetría Avanzada y Visión)* in the University of Murcia, Spain.**

- 2016** **Perimetry: interpretation and limitations** XIII summer course *Current Issues in Vision (Aspectos Actuales en Visión)* by the University of Murcia, Spain.
- 2014 – 2015** **Support lecturer for Fourier Optics for ITN imparted by Larry N Thibos in the University of Murcia, Spain.** ITN is the international training network Marie Curie European Grant. My tasks were to correct theoretical and computational exercises of Thibos' Fourier Optics course with MatLab. I also taught MatLab and provided assistance for the computational exercises to the students, mostly optometrists.
- 2014** **Lecturer for the ITN series of lectures**, which consisted of 60-hours of lectures on statistics (2 courses), communicating science (1 course), and ethics in clinical research (1 course). Attendees were international PhD optometry students from a Marie Curie's initial training network (ITN).
- 2006** **Demonstrator in Geometrical Optics Laboratory** (first-year undergraduate module for Optometry degree) in the Faculty of Life Sciences, University of Manchester.

SUPERVISION TASKS

- 2017 –** Co-supervisor of Sampson Listowell Abu and Koosha Ramezani, research fellows at Racette's Lab.
- 2013 – 2017** Co-director of the PhD thesis by Antonio J. Del Águila-Carrasco.
- 2013 – 2014** Co-supervisor of Rongrong Hu, a research fellow at Racette's Lab.
- 2012** Co-supervisor of a team of part-time programmers at Swanson's Lab.
- 2012** Co-supervisor of Nicole A Stiles for the Dean's Scholar summer student program at Swanson's Lab.
- 2011** Co-supervisor of Kehuan Zhang, a programmer hired during summer for reengineering Swanson's VSG Perimetry program from C++ to MatLab.
- 2011** Co-supervisor Brittany R Adams for the Dean's Scholar summer student program at Swanson's Lab.

EDUCATION

- 2005 – 2009** **PhD in Vision Sciences.** "Information-theoretic analysis of trichromatic images of natural scenes under different phases of daylight" supervised by Prof David H. Foster. Funded by the Engineering and Physical Sciences Research Council
- 1998 – 2000** **MSc in Statistical Science and Techniques** in the Department of Statistics at the Universidad de Granada
- 1995 – 1998** **BSc in Statistics** in the Department of Statistics at the Universidad de Granada

ADDITIONAL EDUCATION

- 2001** Postgraduate courses in Statistics at PhD level taught by the University of Granada

2000 Trainee ABAP IV programmer (SAP environment) in Malaga

2000 Trained secondary school level teacher by the University of Granada

Foster DH, **Marín-Franch I**, Nascimento SMC, Amano K. How efficiently does post-receptoral coding capture information about the natural world? *European Conference on Visual Perception (ECPV)*. Utrecht, the Netherlands. Abstract published in *Perception*, 37 (ECPV Abstract supplement), 2008.

Marín-Franch I, Foster DH. Distribution of information within and across colour spaces. *European Conference on Colour in Graphics, Imaging and Vision (CGIV)*. Terrassa, Spain, 2008.

2007

Marín-Franch I, Foster DH. Cone-signal interactions maximizing information about coloured surfaces in natural scenes. *European Conference on Visual Perception (ECPV)*. Arezzo, Italy. Abstract published in *Perception*, 36 (ECPV Abstract supplement), 2007.

Marín-Franch I, Foster DH. Information available from coloured surfaces in natural scenes under spatially random illumination. *International workshop on Foundations of Computer Vision: Light, Space, and Matter*. Bertinoro, Italy, 2007.

2006

Marín-Franch I, Foster DH. Estimating the information available from coloured surfaces in natural scenes. *European Conference on Colour in Graphics, Imaging and Vision (CGIV)*, pp. 44-47. Leeds, United Kingdom, 2006.

INVITED LECTURES AND PRESENTATIONS

- April 2017** Estadística en ciencias de la visión [Statistics in Vision Sciences]. Departamento de Estadística, Universidad de Granada, Granada, Spain.
- Sept 2016** Interpretación y limitaciones de campimetrías [Interpretation and limitations in perimetry]. XIII Curso de aspectos actuales en vision [XIII Course on current trends in vision], Águilas, Murcia, Spain.
- May 2016** Dynamic accommodation and night myopia experiments with adaptive optics. Indiana University School of Optometry, Bloomington, Indiana, US.
- May 2016** Dynamic accommodation and night myopia experiments with adaptive optics. Indiana University School of Medicine, Indianapolis, Indiana, US.
- May 2016** Can adaptive optics improve diagnosis of ophthalmic pathologies with visual psychophysics? Carver College of Medicine, Iowa, US.
- July 2014** Estimating information from image colors of natural scenes. First Friday Talks (FFT). Departamento de Óptica, Universitat de València, València, Spain.
- Nov 2013** Trabajando de estadístico fuera de España [Working as a statistician outside Spain]. Departamento de Estadística, Universidad de Granada, Granada, Spain.
- Jan 2012** Avoiding 'blind' use of statistics: over-interpretation of statistical methods in glaucoma research. Seminar in the Department of Mathematical Sciences. University of Liverpool, Liverpool, UK.
- Sept 2011** A better estimation of diffuse visual-field loss leads to improved progression indices in glaucoma. Schnurmacher Institute for Vision Research Colloquium (SIVR). The State University of New York, New York, US.
- Sept 2008** Information-theoretic analysis of trichromatic images of natural scenes under different phases of daylight. In WD Wright & MacDonald/Green Awards: An Educational Exercise. The Colour Group of Great Britain. Bradford, UK.

SEMINARS AND OTHERS

- Sept 2011** **Talk.** A better estimation of diffuse visual-field loss leads to improved progression indices in glaucoma. Oxyopia Vision Science Seminars. Indiana University School of Optometry, Bloomington, Indiana, US.
- May 2010** **Talk.** Statistics, colour vision, epidemiology. Department of Optometry and Visual Science, City University London, London, UK.
- Feb 2010** **Talk.** Estimating information from colour signals: an application to digital cameras and natural scenes. Department of Genetics, Biology and Biochemistry, University of Torino, Torino, Italy.
- April 2009** **Talk.** Information theory and statistical efficiency: an application to colour vision of the normal eye. Department of Biomedical Sciences and Human Oncology, University of Torino, Torino, Italy.
- March 2009** **Talk.** Information-theoretic analysis of trichromatic images of natural scenes under different phases of daylight. Department of Psychology, Giessen University, Giessen, Germany.

- Oct 2008** **Poster.** Information available and retrieved in colour images of natural scenes under changes in illumination spectra. Sensing, Imaging & Signal Processing (SISP) post-graduate research conference. School of Electrical and Electronic Engineering, University of Manchester, Manchester, UK.
- July 2006** **Talk.** Constraints on models of surface-colour perception. School of Electrical and Electronic Engineering, University of Manchester, Manchester, UK.
- March 2006** **Talk.** Estimating the information available from coloured surfaces in natural scenes. Seminar Series. Faculty of Life Sciences, University of Manchester, Manchester, UK.
- Nov 2005** **Talk.** Estimating the information available from coloured surfaces in natural scenes. Computational Neurosciences Journal Club. Faculty of Life Sciences, University of Manchester, Manchester, UK.
- May 2005** **Talk.** Information limits on neural identification of coloured surfaces in natural scenes. Computational Neurosciences Journal Club. Faculty of Life Sciences, University of Manchester, Manchester, UK.

REVIEWER TASKS

- Since 2020** Ophthalmology Glaucoma (OGLA). Papers reviewed: 2
- Since 2019** American Journal of Ophthalmology (AJO). Papers reviewed: 1
- Since 2019** Translational Vision Science & Technology (TVST). Papers reviewed: 2
- Since 2019** Journal of Ophthalmology (JOphthalmol). Papers reviewed: 1
- Since 2014** Ophthalmic and Physiological Optics (OPO). Papers reviewed: 2
- Since 2014** Clinical Ophthalmology (CO). Papers reviewed: 2
- Since 2013** Public Library of Science, PLOS One (PONE). Papers reviewed: 2
- Since 2013** Investigative Ophthalmology & Visual Science (IOVS). Papers reviewed: 4
- Since 2011** Clinical & Experimental Ophthalmology (CEO). Papers reviewed: 1
- Since 2011** Current Eye Research (CER). Papers reviewed: 2
- Since 2011** Optometry and Vision Science (OVS). Papers reviewed: 5.
- 2010** Reviewer for the European Conference on Colour in Graphics, Imaging and Vision (CGIV) in Joensuu, Finland. Papers reviewed: 2
